

Pre Purchase Inspection terms and conditions

Please read the following terms carefully - booking a Pre Purchase Inspection online means that you have read, understood and agree to these.

The Pre Purchase Inspection report is provided by Stewart Motors NZ Ltd intended for the Report Owner named on the report. Stewart Motors NZ Ltd is under no obligation to supply information or copies of the report to a third party, however, Stewart Motors NZ Ltd reserve the right to disclose information to a third party on any potential safety issues, regarding the vehicle, which are identified by the inspection.

The Inspection is based on an external examination of components. Due to the time and cost involved, it is not feasible for us to dismantle component assemblies to measure internal parts. These are evaluated by such factors as noise, operation and performance on the road.

The Stewart Motors NZ Ltd Pre Purchase Inspection report only relates to the condition of the vehicle at the time of inspection. The condition of a vehicle can change due to factors such as normal wear and tear, driver abuse, neglect, collision damage or deterioration of internal components that are not able to be inspected.

The Stewart Motors NZ Ltd Pre Purchase Inspection report will not tell you about:

- Hidden defects
- Intermittent problems
- Problems which become apparent after the inspection; or
- Problems which cannot be identified on a visual inspection or without parts of the vehicle being dismantled.

Provided the Inspector has acted with reasonable care and skill, Stewart Motors NZ Ltd are not responsible for any defects or problems with the vehicle that are not identified or identifiable in this inspection.

The 12v battery and alternator testing and assessment is carried out by both an electronic tester and visual examination. The inspector cannot always confirm if the 12v battery fitted is of a suitable type and specification for the vehicle. The 12v battery will be tested according to its own type and specification, where it is possible for the Inspector to determine or to the Inspector's best estimation, where accessible without disassembly of components. The battery test is strictly limited to the 12v battery system and does not include any systems above 12v, including but not limited to batteries and charging systems in Electric vehicle and Hybrid vehicle types.

As part of the Pre Purchase Inspection, a limited road test will be performed up to 50kmph unless otherwise stated in the report. The road test will only be undertaken if the vehicle is in roadworthy condition and conforms to all legal requirements.

The Pre Purchase Inspection report does not contain information about the registration, liens or finance secured over the vehicle, or ownership of the vehicle as at the time of the check.

The Pre Purchase Inspection is intended to provide a report on the mechanical and physical condition of the vehicle at the time of inspection. Because this is a limited inspection, this is not a warrant of fitness inspection, which we advise you get as a condition of purchase. There are many factors that should be taken into consideration when purchasing a used vehicle. For further protection you may wish to consider purchasing a Mechanical Breakdown Insurance policy.
